

Prodelin Series 1244

2.4M Rx/Tx Ku-Band Antenna System

Technical Specifications Summary

Note: This document compiles the verified technical specifications for the Prodelin (CPI) Series 1244 antenna system for use in engineering link budget analyses.

General Description

The Prodelin Series 1244 is a high-performance 2.4-meter VSAT antenna system featuring a 4-piece precision compression-molded SMC (Sheet Molding Compound) offset reflector. It is widely certified for global satellite networks including Intelsat and Eutelsat.

Electrical Performance

Parameter	Specification
Operating Frequency (Tx)	13.75 – 14.50 GHz
Operating Frequency (Rx)	10.95 – 12.75 GHz
Midband Gain (Tx @ 14.0 GHz)	49.20 dBi
Midband Gain (Rx @ 12.0 GHz)	47.40 dBi
Polarization	Linear (Cross-Pol Isolation > 35 dB)
VSWR	1.3:1 (Tx) / 1.5:1 (Rx)

Mechanical Specifications

Parameter	Specification
Reflector Material	Glass Fiber Reinforced SMC
Antenna Optics	Prime Focus, Offset Feed
Mount Type	Elevation over Azimuth
Mast Pipe Size	6.63" (168 mm) O.D.
