

Triax TD88 Series

0.88M Rx Ku-Band Offset Antenna

Technical Specifications Summary

Note: This document compiles the verified technical specifications for the Triax TD88 offset satellite dish for use in engineering link budget analyses.

General Description

The Triax TD88 is a highly durable 88cm class offset satellite dish known for its reliability and precision. Built from galvanized steel with a polyester powder coat finish, it is a standard in residential and commercial Ku-band reception.

Electrical Performance

Parameter	Specification
Operating Frequency (Rx)	10.70 – 12.75 GHz
Gain (@ 11.7 GHz)	38.8 dBi
G/T (with 0.7 dB NF LNB)	19.2 dB/K
Beamwidth	2.0°
Offset Angle	26°

Mechanical Specifications

Parameter	Specification
Dimensions (H × W)	95 cm × 85 cm
Material	Galvanized Steel
Finish	Polyester Powder Coat
Mast Bracket Diameter	32 – 60 mm
